Introduction

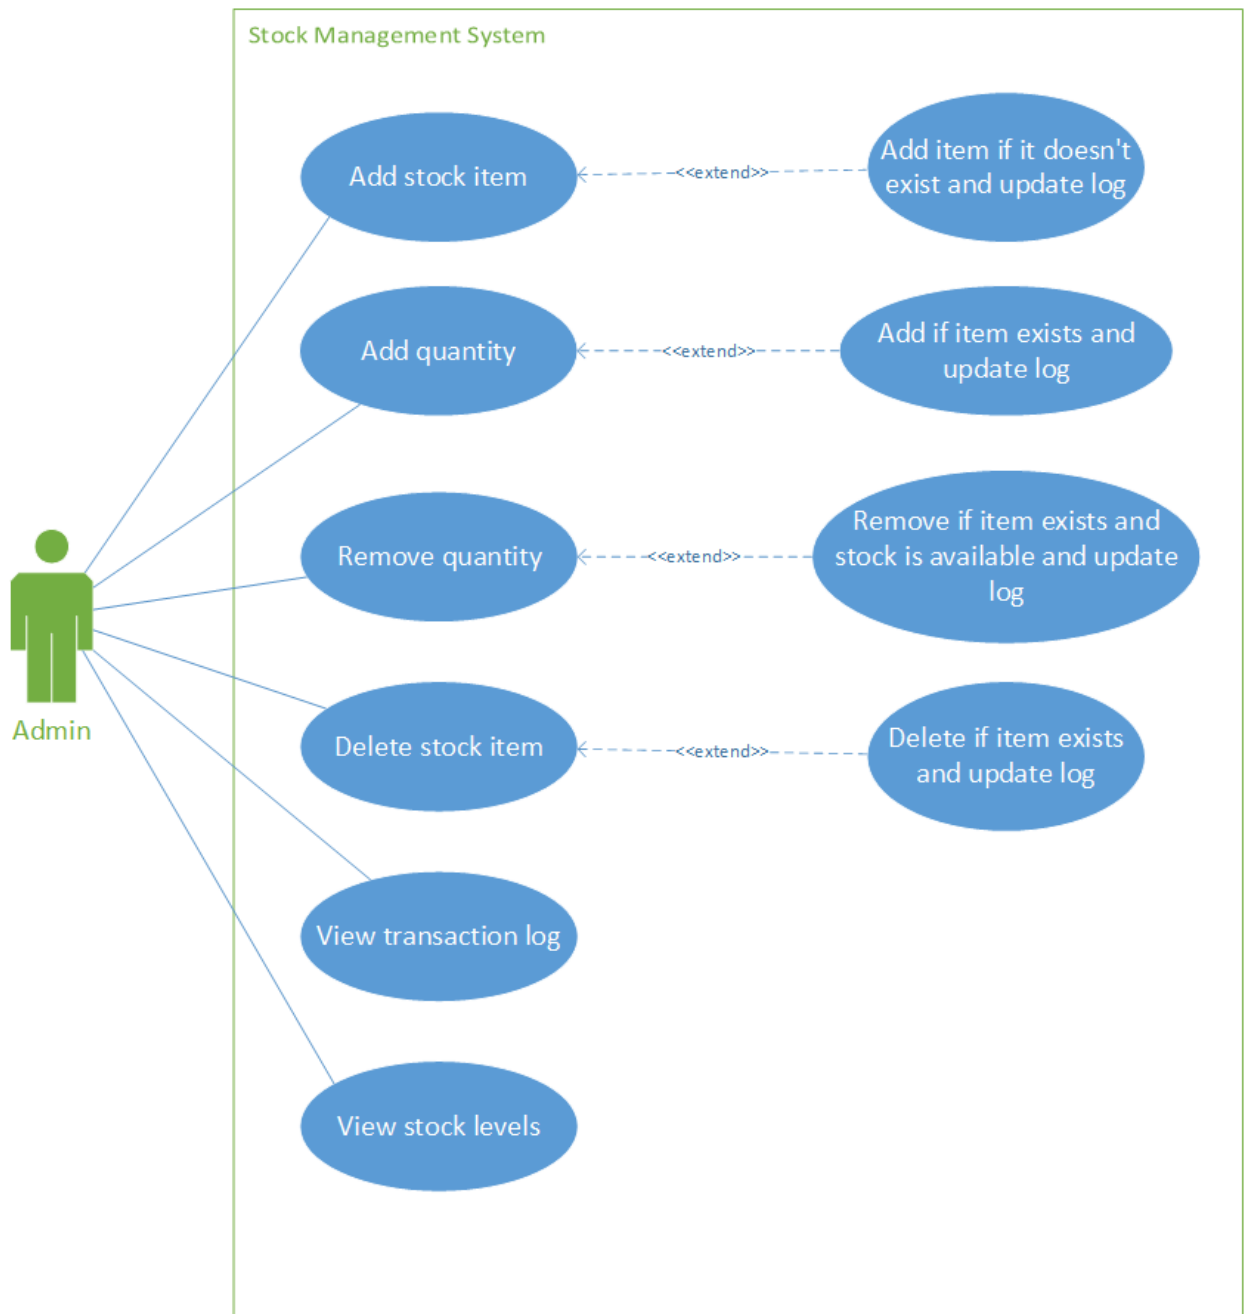

- Module: SDAM-2
- Lecturer: Mr. Upul Anuradha
- Semester: Year 1, Semester 2
- Student: Tehaan Perera (CB012129)

This is the report for the SDAM2 individual assignment. The scenario given was an application for a stock management system which had 6 use cases. As per the requirements, I was supposed to design a UML Use Case diagram for all 6 use cases. Furthermore, I was to pick 2 out of the 6 use cases and draw the relevant UML Class diagram, 2 UML activity diagrams and 2 UML Sequence diagrams (1 for each use case) and develop a Windows Forms App using C# for the chosen use cases.

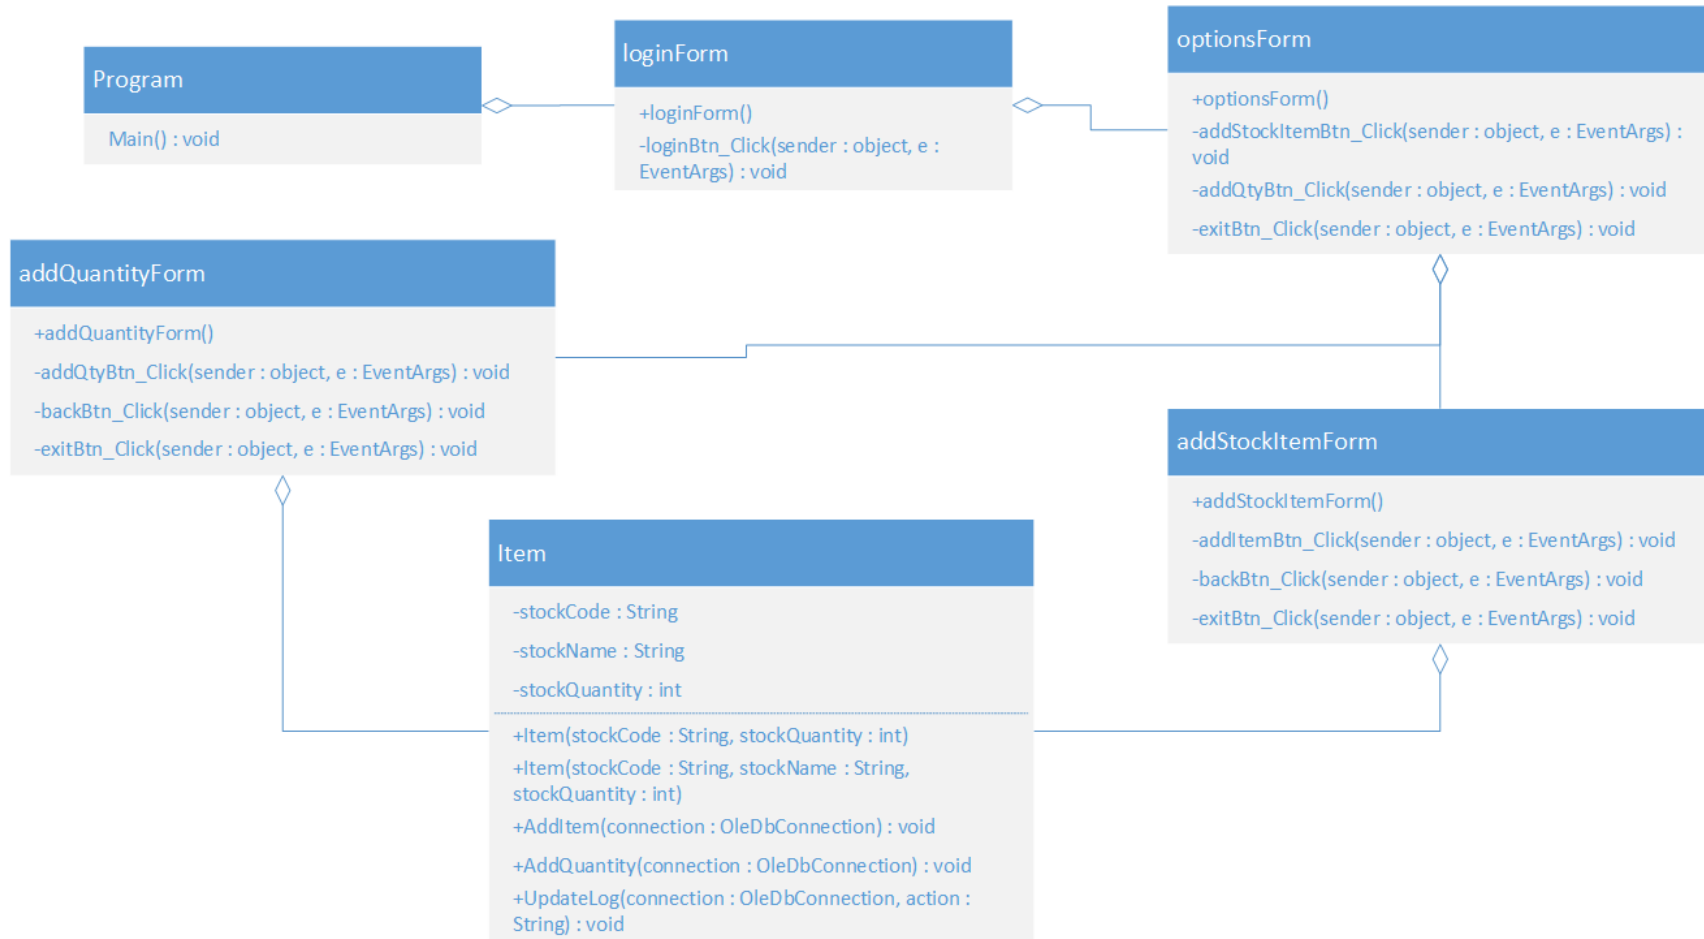

The chosen use cases are,

- Add new item of stock.
- Add quantity to stock item.

Use Case Diagram
